NURSERIES AT CAMBRIDGE, TWO MILES FROM THE CITY.

DESCRIPTIVE
CATALOGUE OF FRUITS,

EMBRACING ALL THE CHOICE AND POPULAR SORTS,
AND MANY NEW AND RARE VARIETIES.

For the Spring and Autumn of 1854.

PRESS OF J. L. HALLWORTH, NO. 57 WASHINGTON STREET, BOSTON.

ADVERTISEMENT.

In presenting to the public another edition of our Descriptive Catalogue of FRUIT TREES, we have the pleasure of stating that great additions have been made to our extensive collection of all kinds of Fruits. Of pears alone we have upwards of seven hundred varieties; of Apples three hundred, and of other fruits a great accession of kinds. Our specimen grounds have been greatly extended, and we have now nearly THREE THOUSAND trees, embracing about fifteen hundred of the different kinds of fruits, most of which are in bearing, and their qualities proved. No pains or expense will be spared to render our collection one of the most complete in the country. Every new fruit of any reputation will be added as speedily as it can be procured, and its qualities proved and made known. Our entire collection is propagated from our specimen trees, which enables us to secure accuracy in names.

In order to afford the amateur cultivator all the facilities possible, a selection of the most desirable fruits, for a small collection, has been made throughout the Catalogue, by designating the names with a star, (*). No fear need be entertained of the most choice assortment, if such are selected. When a number of trees are wanted, and the purchaser, not being familiar with the kinds, leaves the selection to us, he may depend upon our giving his orders our particular attention, and make choice of an assortment which shall comprise the very best varieties enumerated in the Catalogue.

Pear trees on Quince stocks, suitable for training as pyramids, can be supplied of such sorts as grow freely upon that stock. The earlier period at which the trees come into bearing, and the less room they occupy in a small garden, has introduced this mode of grafting on the Quince more generally into practice.

The proper seasons for transplanting trees, are *March, April, and May*, in the *Spring*, and *September, October, and November* in the *Autumn*. For the *South and West*, the most favorable period for transportation is the *Autumn*, when trees may be forwarded to the most distant parts of the Union with entire success. Orders, to insure a good selection, both as regards size and variety, should always be forwarded early, as many sorts are often exhausted before the season is half over.

Bundles of trees, or boxes of plants, will be delivered in Boston *free of expense*, and shipped either direct, or by the way of New York, or forwarded by any of the Express lines or Railroads, to any part of the country.

All letters of inquiries, or application for Catalogues, to receive any attention, must be *post-paid*.

☐ All orders for trees from unknown correspondents must be accompanied with a draft on Boston or New York, payable at sight, or within thirty or sixty days after the delivery of the trees. The fluctuations in exchange, and the expense and trouble of collecting bills at a distance, render it necessary for us to adopt this course.

Catalogues may be had at our Seed Store and Agricultural Warehouse, 7 Merchants Row, Boston, or on application by mail, (*post-paid*), enclosing a postage stamp.

Our Nurseries are situated on the Cambridge road to Mount Auburn Cemetery, half a mile east of Harvard College, and about two miles from Boston. A large Conservatory, three extensive Green-houses, and a Hot-house, have been erected, which are filled with choice collections of Camellias, Roses, Pelargoniums, Ericas, Azaleas, and Miscellaneous Plants. All amateurs and lovers of plants are invited to visit the Nurseries.

In the month of May, a splendid collection of Tulips will be in flower. In June, upwards of 1000 varieties of hardy Roses. During the Summer, an unrivalled collection of Perpetual, Bourbon, Bengal, Tea, and Noisette Roses,—and in September, a magnificent collection of Dahlias and Japan Lilies. In the Conservatory, the Chrysanthemums will be in bloom in November; the Camellias in January; the Azaleas in February; the Roses in March; and the Pelargoniums in April and May. Omnibus coaches pass within a few rods of the Nurseries every fifteen minutes during the day.

☐ A liberal discount will be made to the trade, and to individuals purchasing large quantities of trees.

PARTICULAR NOTICE.—EXTRA SIZED trees, of the most popular kinds, full of FRUIT BUDS, can always be supplied.

☐ All orders should be directed to “Messrs. HOVEY & CO., BOSTON.”

CATALOGUES of Vegetable and Agricultural Seeds, Flower Seeds, Dahlias, Bulbous Roots, Fruit Trees, Forest Trees, and Ornamental Shrubs, Roses, Green-house Plants, &c., may be had separately.

CATALOGUE.

PEARS.

TREES, 50 TO 75 CENTS EACH. NEW AND RARE KINDS, \$1 TO \$2 EACH.

TREES OF EXTRA SIZE, ON THE QUINCE, WITH NUMEROUS FRUIT-BUDS, \$1 TO \$3 EACH.

No pains or expense have been spared to make our collection of Pears one of the most complete in the country. The nurseries of England, Scotland and France have been visited, personally, for the express purpose of selecting all the desirable varieties; and a correspondence with all the principal pomologists in Europe, has enabled us to add every variety worthy of cultivation. Of American seedlings, particular exertions have been made to form a complete collection, and upwards of *eighty* varieties have been obtained, some of which are not surpassed by any foreign kinds. These, it will be seen, we have arranged in a section by themselves, which we hope will be found more acceptable than if intermixed with foreign varieties.

To enable us to become perfectly acquainted with all the numerous varieties, upwards of *Two Thousand* SPECIMEN TREES have been planted out upon the borders of the walks, which are now in full bearing, affording an opportunity for ascertaining their relative qualities, and of ensuring correctness in their nomenclature. We particularly invite our friends and all pomologists to inspect our trees.

In a collection so extensive, it is impossible to keep a stock of all the varieties; but when trees cannot be furnished scions can be substituted in their place.

Those marked (Q.) may be had upon the quince stock.

1. AMERICAN VARIETIES.

NAME.	Size.	Qua	Text.	Season.	REMARKS.
1. Andrews,*	1	1	melt.	Septem.	A delicious pear.
2. Adams,	1	1	melt.	Septem.	New, beautiful and delicious.

ADDITIONAL PEARS.

We have in our collection upwards of THREE HUNDRED VARIETIES of Peats, besides those above enumerated, whose qualities have not been fully proved. Many of them will probably prove synonymous with the above, while others will, without doubt, be new and highly valuable additions to any collection. They have been received from various sources, both abroad and at home. Specimen trees of all of them are planted out, and as fast as they are proved their qualities will be made known. Trees of many of them will be for sale in the autumn of 1854.

APPLES.

25 TO 30 CENTS EACH; \$20 TO \$25 PER HUNDRED.

The collection of Apples contains many new and rare varieties of superior quality; all the Foreign varieties are distinguished by the letter (F.)

The 3d column denotes the size; the 4th the use—T for table, K for kitchen; the 5th the season; and the 6th, remarks on the character of the variety.

QUINCES.

33 CENTS EACH.

The following are the most distinct varieties of the Quince, others being merely sub-varieties produced from seed. The Portugal ripens very late.

NAME.	Size.	REMARKS.
1. Common,	medium	The commonly cultivated kind.
2. Orange,	large	Large, early and handsome.
3. Portugal,	large	Very late but excellent.

Also the Angers, and other quinces, used extensively for stocks for pears.

GOOSEBERRIES.

20 CENTS EACH:—\$2 PER DOZEN.

Many of the Gooseberries differ so little, and the varieties are so numerous, that it has not been thought necessary to distinguish them otherwise than by classes and names. Our collection is annually received from one of the most extensive European collections, and comprises the most esteemed prize sorts.

I. RED.	II. WHITE.	III. GREEN.	IV. YELLOW.
Crown Bob,	Eagle,	Angler,	Golden Farmer,
Huntsman,	Bonny Lass,	Conquering Hero,	Gold Chain,

Dearborn's Seedling,	Louis Bonné of Jersey, (Q.)	Verte Longue, (Q.)
Doyenne d'Ete,	Leon le Clerc, Van Mons,	Winter Nelis.

REMARKS ON TRANSPLANTING TREES.

No work is more carelessly or heedlessly performed, by individuals in general, than planting trees. Few persons seem to be aware that a tree is a living object; to expect success, therefore, in transplanting them, some care must be taken in performing the operation. The following brief rules may be some guide to those who have not had any experience in setting out trees.

I. Never plant a tree unless the ground has been previously well pulverized and broken fine. To plant trees in holes, as too many persons do, is almost fatal to their future growth.

II. Deep planting is one of the greatest errors in planting in this country, and probably more trees die from this cause than all others; if they thrive for a year or two they soon languish and die, apparently without any cause. In cold, clayey soils, this is frequently the case. Avoid, by all means this error. The surface roots should never be more than two inches below the soil.

III. When the trees are all ready for setting out, commence planting by taking out the earth to the depth of a foot or more, and of a width sufficient to admit all the roots easily, without bending or breaking. If the soil is naturally poor, some very old and decayed manure may be thrown into the bottom of the holes *below the roots*; then fill in among the roots with earth, enriching it slightly with *fine* compost.

IV. Before planting, prune the large roots carefully with a sharp knife, cutting off all bruised or decayed portions, shortening such as are too long, and taking out those where too much crowded; avoid injuring or cutting off any of the small fibres.

V. The most important rule to be observed in setting out trees, and one which should never be lost sight of, is to fill in the earth firmly around and among the roots, so that *no hollows* or crevices may remain; avoid, however, jerking the tree up and down—merely give it a few taps at the base, which will be quite sufficient, if the soil is not thrown in too hastily and in too large quantities at once. Fill up the hole carefully, leaving a little basin at the base of the tree. If dry weather immediately ensues, a pail or two of water may be given to each tree, which, as soon as it has settled among the roots, should be lightly earthed over to prevent evaporation. Mulching, with coarse, strawy manure, is occasionally resorted to, especially if hot, dry weather succeeds.

VI. Do not neglect the trees because they are set out—the work of cultivation has but just commenced. Keep the ground continually loose around the trees: see that no insects attack them: look after the growth of the wood: and commence with *Summer* pruning in July, when all very rapid shoots should be shortened. Stake the trees if crooked, and they will soon be straight and handsome ones. At each winter pruning cut out all unnecessary wood, and give the trees a washing with whale oil soap. Do not plant any crop within at least six feet of the trunk of the tree.

HOVEY & CO.

SEED STORE AND AGRICULTURAL WAREHOUSE,
7 MERCHANTS ROW . . . BOSTON,

OFFER FOR SALE ONE OF THE MOST EXTENSIVE COLLECTIONS OF
VEGETABLE, AGRICULTURAL AND FLOWER

SEEDS

TO BE FOUND IN THE COUNTRY, COMPRISING A LARGE ASSORTMENT OF
